

## Bot Construction Group Receives Environmental Leadership Award

**April 24, 2012, Oakville, Ontario** – Bot Construction Group has been honoured by being named the 2012 Winner of the Green Leadership and Sustainability Award, presented by the Ontario Road Builders' Association (ORBA) in partnership with the Ministry of Transportation (MTO) and the Ontario Good Roads Association (OGRA). The 2012 award recognized Bot for developing and implementing a systematic, company wide approach to environmental protection and sustainability practices on its road construction projects.

“We are very pleased to have our Environmental Management System and our commitment to environmental protection and sustainability recognized in this way,” said Steve Bot, Vice-President & General Manager. “With this program, we’ve made environmental stewardship an integrated part of our construction operations. The program gives every person on the jobsite a way to protect the environment in a practical, tangible way.”

Bot voluntarily developed and implemented its Environmental Management System (EMS), borrowing from the ISO 14001 model approach and tailoring processes to adapt to the conditions on highway construction projects, explained Mike Beatty, Manager Quality and Environmental Management Systems at Bot.

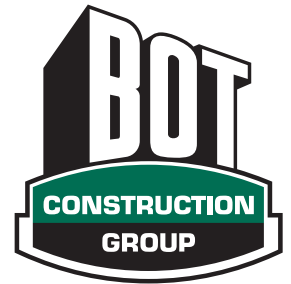

“The award program is excellent way to showcase and promote the innovations and measures that are a part of road building today. We extend our congratulations to Dufferin Construction and The Miller Group on receiving recognition under the Award program for their innovations in paving materials and recycling technology,” offered Steve Bot.

Introduced in 2010 by ORBA in partnership with the Ministry of Transportation and the Ontario Good Roads Association, the Green Leadership and Sustainability Award recognizes the priority given to environmental protection on highway construction projects and the innovations and on-going environmental leadership shown by road builders towards the objectives of environmental stewardship and sustainability.
