

## Bot to Build 28 Bridges for Highway 407 East, Phase 1 Extension

**Oakville, ON – September 15, 2013:** Bot Engineering & Construction Ltd. has contracted to build 28 bridge structures for the Highway 407 East, Phase 1 extension project, under sub-contract to the 407 East Construction General Partnership (407ECGP). The 407 East Phase 1 extension, a design-build-finance-maintain (DBFM) project of the Ministry of Transportation, Ontario and Infrastructure Ontario, will extend Highway 407 over 20.3 kilometres easterly from Brock Road in Pickering to Harmony Road in Oshawa and establish a new connection between Highways 407 and 401.

“We’re pleased to be involved in the continuation of this much needed highway expansion,” said Steve Bot, Vice President and General Manager, Bot Construction Group. “Bot completed extensive excavation and structures work for the Highway 407 West build in 1999 to 2001. Our operations on Phase 1 East are now underway. We are looking forward to working with 407ECGP on this next phase of the expansion through the Durham Region.”

The works sub-contracted to Bot include structures for a major interchange that will connect the new, four lane, north-south West Durham Link to Highway 401 at Whitby, just east of Lake Ridge Road.

The \$1B design, build, finance and maintain contract for the 407 East Phase 1 extension was awarded to the 407 East Development Group, a joint venture between SNC-Lavalin and Cintra Infraestructuras’ respective subsidiaries. 407ECGP is the design build contractor of 407EDG.
